

The available quantity of end-of-life aluminium scrap today is limited

■ Due to the long lifespan of volume-wise dominant aluminium applications such as buildings and transport vehicles, **the available quantity of end-of-life aluminium scrap today is limited.**

■ **75% of all aluminium ever produced** since the start of its industrial production **is still in use.**

■ Because of continuous **market growth**, the current aluminium material demand cannot be filled by the available recycled aluminium from end-of-life scrap. **The missing quantity has to be supplied by the primary aluminium industry.**

■ In Europe, about half of the aluminium produced **originates from recycled materials.**
